Thanks for your cooperation!

More info to come ...

OSHA Releases New Educational Bulletin On Injury Recording Requirements To Help Protect Temporary Workers

WASHINGTON – The U.S. Department of Labor's Occupational Safety and Health Administration today released a new educational resource that focuses on requirements for injury recording of temporary worker injuries and illnesses. The bulletin explains the requirements for both the staffing agency and the host employer. The new [Recordkeeping Bulletin](#)* addresses how to identify who is responsible for recording work-related injuries and illnesses of temporary workers on the OSHA 300 log.

OSHA's Temporary Worker Initiative is an agency-wide concerted effort that uses enforcement, outreach and training to assure that temporary workers are protected in their workplaces. In recent months, OSHA has received and investigated many reports of temporary workers suffering serious or fatal injuries, many of which occur within their first week on the job. OSHA's initiative was launched to raise awareness and compliance with requirements that temporary workers receive the same training and protection that existing workers receive.

"The Recordkeeping Bulletin is the first of many materials we are releasing and helps clarify which employers are responsible for reporting injuries and illnesses," said Dr. David Michaels, assistant secretary of labor for occupational safety and health. "These materials will provide valuable information for both host employers and staffing agencies on how they can work together to make sure their workers are properly trained and protected."

"The American Staffing Association appreciates and supports OSHA's efforts to ensure temporary workers' safety and well-being, and looks forward to continuing to work with OSHA towards that end," said Stephen Dwyer, general counsel with ASA, the national trade association representing the staffing industry.

Under the OSHA Recordkeeping regulation ([29 CFR 1904](#)), covered employers are required to prepare and maintain records of serious occupational injuries and illnesses.

The temporary worker Recordkeeping Bulletin helps businesses determine which employer is responsible for recording work-related injuries and illness on the OSHA 300 log. This is the first in a series of guidance documents that will be released to support the initiative to raise awareness about compliance with OSHA requirements for temporary workers.

For more information on OSHA's Recordkeeping and Reporting requirements, visit <https://www.osha.gov/recordkeeping/index.html>. Additional information and resources on temporary workers can be accessed at https://www.osha.gov/temp_workers/.

Under the Occupational Safety and Health Act of 1970, employers are responsible for providing safe and healthful workplaces for their employees. OSHA's role is to ensure these conditions for America's working men and women by setting and enforcing standards, and providing training, education and assistance.

This article was taken from the OSHA website. For more information on this topic, visit www.osha.gov. Please share this information with your employees.

UPCOMING WORKSHOPS....

EVENTS/WORKSHOPS:

What can SJB Group do for You?

SJB Group, LLC can provide **free assistance** to certified LADOT DBE firms in the following areas:

SJB Group can assist you by: preparing company business cards, profile sheets, and providing information on recommended target areas for your marketing efforts.

By acting as a liaison between the DBE Contractor and Prime Contractor for project information, and in problems occurring on the jobsite.

By informing of upcoming LADOT lettings, and project information for other agencies throughout the state. SJB can assist you in locating bid tabulation information as well.

By providing assistance and guidance on material takeoffs, bid preparation and estimating, project scheduling, and planning for projects that DBE firms are bidding or plan to bid in the near future.

By helping with office computer operations to include trouble-shooting problems, Internet access and software installation, and basic to technical computer training.

By assisting in financial areas such as loan and bond package preparations, company financial statements, business plan preparation, and SBA 8(a) and Hub-Zone certification packages.
