LOUISIANA DEPARTMENT OF TRANSPORTATION AND DEVELOPMENT

ENTITY CONTRACT FOR CAREY ST. PAVEMENT REHABILITATION (CE&I)

CONTRACT NO. 4400026839 | STATE PROJECT NO. H.014317.6

ALL SOUTH CONSULTING ENGINEERS, LLC

652 PAPWORTH AVENUE, METAIRIE, LOUISIANA 70005 OFFICE: (504) 322-2783 | FAX: (504) 322-2787

DOTD FORM: 24-102

PROPOSAL TO PROVIDE CONSULTANT SERVICES

(Revised January 1, 2023)

Prime consultant shall complete the DOTD Form 24-102 without altering the Form's text; however, the instruction and/or guidance for Sections 12 through 23 can be removed but do not remove Section title and number.

ANY CONSULTANT FAILING TO SUBMIT ANY OF THE INFORMATION REQUIRED ON THE DOTD FORM 24-102, OR PROVIDING INACCURATE INFORMATION ON THE DOTD FORM 24-102, MAY BE CONSIDERED NON-RESPONSIVE.

1.	Contract Name as shown in the advertisement	ENTITY CONTRACT FOR CAREY ST PAVEMENT REHABILITATION (CE&I)
2.	Contract Number(s) as shown in the advertisement	4400026839
3.	State Project Number(s), if shown in the advertisement	H.014317.6
4.	Prime consultant name (name must match as registered with the Louisiana Secretary of State where such registration is required by law)	All South Consulting Engineers, LLC All South Consulting Engineers
5.	Prime consultant license number (as registered with the Louisiana Professional Engineering and Land Surveying Board (LAPELS) if registration is required under Louisiana law)	Louisiana Civil Engineer License EF.0003140 Louisiana Survey License VF.0000730
6.	Prime consultant mailing address	652 Papworth Avenue, Metairie, Louisiana 70005
7.	Prime consultant physical address (existing or to be established, if location is used as an evaluation criteria)	652 Papworth Avenue, Metairie, Louisiana 70005
8.	Name, title, phone number, and email address of prime consultant's contract point of contact	Timothy P. Bonura, P.E., Principal in Charge (504) 322-2783 tim@ascellc.com
9.	Name, title, phone number, and email address of the official with signing authority for this proposal	Timothy P. Bonura, P.E., Principal in Charge (504) 322-2783 <u>tim@ascellc.com</u>

10.	This is to certify that all information contained herein is accurate and true, and that the team
	presently has sufficient staff to perform these services within the designated time frame. By
	submitting this proposal, proposer certifies that it is not engaged in a boycott of Israel and it
	will, for the duration of its contract obligations, refrain from a boycott of Israel. Proposer also
	certifies and agrees that the following information is correct: In preparing its response, the
	proposer has considered all proposals submitted from qualified, potential subcontractors and
	suppliers, and has not, in the solicitation, selection, or commercial treatment of any
	subcontractor or supplier, refused to transact or terminated business activities, or taken other
	actions intended to limit commercial relations, with a person or entity that is engaging in
	commercial transactions in Israel or Israeli-controlled territories, with the specific intent to
	accomplish a boycott or divestment of Israel. The proposer also has not retaliated against any
	person or other entity for reporting such refusal, termination, or commercially limiting actions.
	DOTD reserves the right to reject the response of the bidder or proposer if this certification is
	subsequently determined to be false, and to terminate any contract awarded based on such a
	false response

Signature above shall be the same person listed in Section 9:

May 10, 2023

Date:

11. If a Disadvantaged Business Enterprise (DBE) goal has been set for this Firm(s): advertisement, indicate which firm(s) will be used to meet the DBE goal and each firm(s)' percentage.

Firm(s)' %:

12. Past Performance Evaluation Discipline Table:

As indicated in the advertisement, insert the completed table here. The percentages for the prime and sub-consultants must total 100% for each past performance evaluation discipline, as well as the overall total percent of the contract.

The **only** past performance evaluation disciplines to be used are: Road, Bridge, Traffic, CE&I/OV, Geotech, Survey, Environmental, Data Collection, Planning, Right-of-Way, CPM, ITS, Appraiser and Other (please specify).

Past Performance Evaluation Discipline(s)	% of Overall Contract	All South Consulting Engineers	Firm B	Firm C	Firm D	Firm E	Each Discipline must total to 100%
CE&I/OV		100%					100%
Identify the percentage of work for the overall contract to be performed by the prime consultant and each sub-consultant.							
Percent of Contract	100%	100%					

13. Firm Size:

For all firms that are part of this team, indicate the approximate number of personnel to be committed to this contract, by DOTD Job Classification and the total number of personnel within the firm that could provide support, if needed. If a specialized job classification is required and not included on the DOTD job classification list, specify "Other (please specify)" and include the classification title inside the parentheses.

The DOTD Job Classification(s) to be used can be found at the following link:

http://wwwsp.dotd.la.gov/Inside_LaDOTD/Divisions/Engineering/CCS/Job_Qualification/Job%20Classifications%20with%20Descriptions.pdf

		Number of	Total number of personnel

(Add rows as needed)

14. Organizational Chart:

Provide an organizational chart showing ALL relevant prime consultant and sub-consultant (if applicable) personnel assigned to the contract, area of project responsibility for each, and reporting lines for the purposes of this contract. An individual's role does not necessarily have to match their DOTD job classification identified in Section 13. If applicable, identify all personnel performing traffic engineering analysis and/or QC of traffic engineering analysis by placing an asterisk next to their name. Include the certificates required by the Traffic Engineering Process and Report Training Requirements article of the Advertisement in Section 20. It is acceptable to use an 11x17 format for Section 14.

15. Minimum Personnel Requirements:

Use the table below to identify both prime consultant and sub-consultant staff designated to work on this contract meeting the Minimum Personnel Requirements (MPRs) specified in the advertisement. Ensure the résumé reflects the required experience stated in the MPR. Make sure the P.E. discipline is also listed (highlighted in table) that is meeting the MPR; e.g. professional civil engineer should show the discipline of the license as civil if meeting that MPR.

MPR No. Do not insert wording from ad	Personnel being used to meet the MPR (Individual(s) may not satisfy more than one MPR unless specifically allowed by Attachment B of the advertisement)	Firm employed by	Type of license and discipline meeting MPR/certification & number (Ex: PE # - Civil)	State of license	License / certification expiration date

3	Jens J. Nielsen, Jr., P.E.	All South Consulting Engineers	P.E. – Civil, LA License No. 27096	LA	9/30/2023

16. Staff Experience:

Résumés shall be provided for all prime and sub-consultant personnel listed in Sections 14 and/or 15 of the proposal. Résumés of personnel not identified in Section 14 or Section 15 of the proposal should not be included and will not be evaluated. Résumés should be **limited to 2 pages per person**. Any certificates required by the advertisement are to be placed in Section 20.

	that was installed in a 7-c	lay period, wo	king 24 hours per day. It also included two new signalized into	ersections. New roadway	

	sections included 12" sand sub base and 8" Class II base course with 2" of Asphaltic Concrete Type 8F wearing surface and 6" of binder course. Project also consisted of relocation of 30" duetile iron water main and several sewer line relocations.
02/05 - 05/14	Allo Street Bridge Replacement Jefferson Parish, Louisiana: Mr. Nielsen performed design services and construction administration on the cast-in-place concrete box culvert canal crossing at Allo Street and Patriot Street. In addition to the box culvert, design included concrete flumes for concrete canal section, roadway alignment, and pedestrian access routes for the new canal crossing. Project was integrated into the USACE SELA Project for Patriot Canal Improvements.
09/10 - 11/12	South Plaquemines High School Concrete Bridge Buras, Louisiana: Mr. Nielsen oversaw the design of all civil and structural engineering features which included a new concrete bridge at South Plaquemines High School. All South provided professional engineering design of a 3-lane bridge with pedestrian crossing and handled the contract administration duties including bidding responsibilities for the project. The bridge spans 99' with three 33' spans constructed of concrete deck supported by concrete caps and concrete piles. It contains a protected sidewalk with of guardrails and jersey barriers. Bank stabilization consisted of sheet piling and limestone.
2000-2001	Terry Parkway Widening <i>Jefferson Parish</i> , <i>Louisiana</i> : Mr. Nielsen was the Project Manager for two additional lanes along Terry Parkway connecting the Crescent City Connection off Ramp to the at grade roadway of Terry Parkway. This project included new traffic signal intersection, Jersey barrier divider, and new sub surface drainage, project coordination with Parish, State and Crescent City connection engineers.
2003-2004	West Metairie Additions and Improvements Jefferson Parish, Louisiana: Mr. Nielsen was the Project Manager for this project which included improvements to an existing bridge and the addition of a back to back U-turn over the West Metairie canal capable of accommodating a WB-50 movement. Additionally, radius and signalization improvements were made at a third intersection.
2000-2002	Veterans Boulevard & Cleary Intersection Improvements <i>Jefferson Parish, Louisiana</i> : Mr. Nielsen worked as resident project representative on this several mile long overpass. This project was constructed without damaging the wetlands below. Construction techniques were used in order to construct from the new expressway sections.
2003-2004	Causeway Boulevard Northshore Widening <i>St. Tammany Parish, Louisiana</i> : Mr. Nielsen was the Construction Manager for the widening of Highway 190 from West Approach to LA 21. He worked with Causeway Commission and St. Tammany Parish to ensure project was constructed per plans and specifications and followed LADOTD design criteria. He also reviewed contractor invoices and design changes due to actual field conditions.
Competed: 1991	310 from I-10 to Airline Highway Jefferson Parish, Louisiana: Mr. Nielsen worked as resident project representative on this several mile long overpass. This project was constructed without damaging the wetlands below. Construction techniques were used in order to construct from the new expressway sections.

Louisiana. These streets lesign and construction		

	repairs in a set of project documents. Mr. Schorr's duties included overseeing all design and assuring that all eligible work was included in the project plans. He also created details and roadway sections to illustrate how to the work should be constructed.
10/18 – Ongoing	Bayou Bonfouca Canal Drainage Basin Infrastructure Repairs Slidell, Louisiana: Mr. Schorr was the primary project manager for the rehabilitation of about 3000 concrete road panels and over 6,460' of asphalt roadway in Slidell, Louisiana. These streets were damaged in Hurricane Katrina, and Mr. Schorr provided day to day management of the design and construction management for this project. During construction of the project, scope was added to repair over 700 LF of 4'x6' box culverts. Mr. Schorr preformed all aspects of design and construction admin for the projects which included precast boxes, cast in place box culverts, and cured in place pipe (CIPP) repairs for areas that were inaccessible from above ground. Construction admin for the project included coordinating construction phases with the contractor, resident inspector and Owner, and working with the contractor to resolve unforeseen construction conditions.
09/13 – 06/14	Airport Road Phase 2b St. Tammany Parish, Louisiana: The Airport Road Phase 2b Project was new road construction projected that consisted of roughly 3.7 miles of asphalt pavement with base, new drainage and striping. Mr. Schorr's duties included reviewing and approving all shop drawings and responding to RFI's, attended construction progress meetings, and visited the site to resolve any conflicts, and reviewed pay requests and change orders from the contractor. He also reviewed the resident inspector's daily reports and made sure that the critical path was being met on schedule and ensured that the daily reports documented all the key elements of construction.
09/22 - 04/23	LaDOTD North Carnation Street Pavement Rehabilitation Slidell, Louisiana: This project consists of Roadway rehabilitation in the City of Slidell and includes concrete and asphalt roadway work and other drainage improvements including the installation of multiple box culverts both next to and beneath the roadway. As the Project/Construction Manager for this project, Mr. Schorr's responsibilities included: Construction management, inspector management, project coordination, client coordination, SiteManager inputs, utility coordination, contractor coordination, change orders, submittal reviews, update meetings.
07/22 - 03/23	LaDOTD Natchez Drive Rehabilitation <i>Slidell, Louisiana:</i> This project consists of Roadway rehabilitation in the City of Slidell and includes concrete and asphalt roadway work and includes drainage improvements along Natchez drive. As the Project/Construction Manager for this project, Mr. Schorr's responsibilities included: Construction management, inspector management, project coordination, client coordination, SiteManager inputs, utility coordination, contractor coordination, change orders, submittal reviews, update meetings.
10/22 – 01/23	LaDOTD Lindberg Drive @ US 190 (Gause Blvd) <i>Slidell, Louisiana:</i> This project consists of Roadway rehabilitation in the City of Slidell in a heavily trafficked area of the City. The project includes concrete and asphalt roadway work, the addition of a turning lane onto Gause Blvd. to alleviate traffic issues in the area, and drainage improvements along Lindberg Drive. As the Project/Construction Manager for this project, Mr. Schorr's responsibilities included: Construction management, inspector management, project coordination, client coordination, SiteManager inputs, utility coordination, contractor coordination, change orders, submittal reviews, update meetings.

17. Firm Experience:

Identify the team's project experience most relevant to the scope in the advertisement. The projects should be limited to a total of 20, with no more than 5 projects being represented by the prime consultant and with no more than 3 projects represented by each sub-consultant on the team. If more than 5 projects are identified for the prime consultant, all projects identified after the first 5 will not be evaluated. If more than 3 projects are identified for a single sub-consultant, all projects identified after the first 3 from that sub-consultant will not be evaluated. Include no more than one page per project. Projects identified shall only include work performed by firms on the team. The projects identified do not necessarily need to have been DOTD projects.

This project is a roadway rehabilitation project that includes drainage, milling, full depth asphalt replacements, in place cement stabilized base course, asphalt concrete overlay and concrete driveway and curb replacements. The project is funded under the Federal Aid Highway Program through FHWA and LaDOTD. All South's role is as Construction Administrators and to provide Resident Inspection for the projects. All inspectors must be LaDOTD certified in either embankments, concrete or asphalt in order to be eligible to inspect the construction.

The project is governed by LaDOTD standard specifications. All construction related documentation must be submitted through Sitemanager and all materials used in construction must be from the approved list provided by LaDOTD. Construction related documentation includes daily quantities, daily engineer diaries, change orders, material testing, mix designs, estimates, work summaries, and RFIs. All South is also responsible for field changes, translation of the construction documents, utility coordination, employee interviews for Davis Bacon compliance and delivering EEO notices to the contractors.

As a result of Hurricane Katrina, City of Slidell was inundated with several feet of water causing damage to all public and private facilities and damaging roadway bases and utilities. The City of Slidell hired All South to evaluate the condition of the roadways and utilities. Through our vast experience, All South understands the justification required to ensure eligibility. Once the scope of work was identified, our firm worked with the City, the State (GOHSEP) and the federal government (FEMA) to develop the project worksheets to justify the funds. Once the Project Worksheets were written, All South prepared construction documents for public bid. All along this process, we continually worked with FEMA and GOHSEP to ensure all damage elements were captured and included in the repairs. Our team completed a construction project in the Schneider Canal Drainage Basin (Schneider I) and just completed construction on another phase of these repairs (Schneider II).

PROJECT HIGHLIGHTS

- Civil Design/Survey/CA/RI
- Drainage Repairs 10,464 LF
- Sewer Repairs 42,259 LF
- Concrete Repair 65,569 SY
- Asphalt Repairs 37,902 SY
- FEMA, FHWA, DOTD, USACE, SLFPA Coordination

All South performed the construction management and inspection duties for the Schneider I Construction Project. To ensure the construction is completed as directed in the plans and specifications and within the allotted time and within budget, our team conducted monthly onsite progress meetings with the owner and contractor, along with periodic site inspections. To ensure all repairs were completed and recorded properly, All South diligently reviewed all inspection reports, logs all completed repairs and maintains as-built construction plans. During all phases of this project, All

South worked with the City of Slidell on filling out the appropriate payment applications and ensure that all possible federal funds are captured.

All South Consulting Engineers is currently providing professional engineering services as part of the recovery roads program for several neighborhoods in Uptown New Orleans. This work is part of the FEMA funded Capital Improvements Program, a program that is available to areas that were inundated in a disaster. The scope of services included assessing the damage to roadways, curbs, sidewalks, driveways, ADA ramps, and comparing that damage to the assessment in the FEMA project worksheets. The project scope also included adding in additional pavement repairs caused by demolition of properties as well as repairs for purposes of constructability. As part of this assessment, All South individually inspected each of the streets in these neighborhoods.

Following the completion of the Project Scoping Report, All South negotiated on behalf of the City with FEMA to resolve discrepancies between the project worksheets and the Scoping Report. Once final design is completed, All South will produce construction documents, manage the advertisement and bidding of the project, and will provide contract administration and resident inspection for the FEMA-eligible roadway improvements inside the project area.

PROJECT HIGHLIGHTS

- Civil Design/Survey/CA/RI
- Concrete Repairs 25,436 SY
- Asphalt Repairs 252,509 SY
- ADA Ramp Repairs 9,060 SY
- Drainage Repairs 24,284 LF
- Sewer Repairs 24,200 LF
- Water Repairs 17,834 LF
- FEMA, SWBNO, SLFPA-E, LaDOTD, FHWA, Coordination

To ensure the accuracy of project quantity totals and costs throughout the life of these projects, All South provides the City with recorded quantities and observations via customized daily work reports. These reports are used by All South and DPW to guarantee accuracy of project quantities used in Contractor invoicing to anticipate quantity overruns/underruns and keep projects on schedule. All South has extensive familiarity with construction projects throughout the region in reviewing reports and verifying Contractor monthly invoices with various platforms and software. All South uses this experience to optimize the product for DPW New Orleans. All South also submits innovative, customized daily photo work reports which include

inspection photos with relevant descriptions of the work being performed. This is included separately with each daily work report done by the inspector.

All South Consulting Engineers, LLC

18. Approach and Methodology:

Provide a description of how the work will be performed and provide the proposed project schedule. Include any additional information or description of unique resources that are planned to be used to produce the deliverables. Include any proprietary technologies, methods or approaches that will be used on this project to improve quality or efficiency. If the proposal is for an IDIQ contract, the consultant should review the scope of services in Attachment A to the advertisement to obtain a general understanding of what a typical task order would entail. Based upon that understanding, the consultant should provide a sample schedule that identifies the major milestones, deliverables, tasks, etc., to demonstrate sufficient understanding of a typical task order. The duration of the task order is not required. This section shall be limited to four pages. If more than four pages are included, all pages after the fourth page will not be evaluated.

If the consultant has information it believes is proprietary, label it accordingly.

All South's proposed Approach and Methodology to the CE&I for Carey St Pavement Rehabilitation is summarized in the graphic below, and detailed more extensively in this Section.

CE&I Task 1: Internal Review with DOTD

All South's plan begins with an Internal Review with DOTD. This first step is essential toward ensuring DOTD receives the outcome they desire. This Task is intended to establish confirm project goals and objectives and set project expectations.

All South will request an advanced copy of the project plans and specifications from the DOTD project engineer and will take this opportunity to initially familiarize ourselves with the project particulars prior to meeting with DOTD. All South will conduct a plan-in-hand walk-through prior to meeting. All South will prepare a list of questions and observations based on this review and will use this list as draft topics for discussion during an initial meeting with DOTD. All South intends to finalize project goals and objectives during this meeting. Initial goals established during design may need to be refined prior to construction start.

Project expectations will be established related to performance, reporting, communication, chain-of-command, and other general responsibility standards between All South and DOTD, and as defined in DOTD's Standards and Procedures.

CE&I Task 2: Pre-Construction Activities

Task 2 includes activities with the Contractor, All South, and DOTD to implement the project. These activities include developing an internal performance plan and conducting a pre-construction meeting.

All South will develop an internal performance plan, identifying the roles of all internal team members. This plan will itemize project milestones and deliverables and assign resources to fulfill these requirements, including: field testing, inspection, and reporting; Site Manager updates and

management; construction correspondence tracking; and As-Built documentation. DOTD will retain a single point-of-contact with All South. Steven Schorr will attend the initial project meeting, along with Jens Nielsen, III. Jens Nielsen, III will perform day-to-day construction administration and engineering tasks out of our Metairie office.

A pre-construction meeting with all stakeholders will be held and guided based on DOTD's pre-construction conference checklist. All South will conduct this meeting on behalf of DOTD. DOTD and All South will review the contractor's proposed schedule, including critical path scopes of work. Anticipated scheduling considerations for this project will include peak traffic times and construction equipment staging. Peak traffic counts should be utilized in timing and construction sequencing.

CE&I Task 3: Construction Activities

During construction, All South will follow our internal performance plan developed above. Notes and records will be kept in accordance with DOTD's reporting requirements, as detailed in the "Construction Contract Administration Manual."

All South will provide construction administration and daily onsite inspection. Daily schematic workflows will be as follows:

Construction Inspection Proposed Daily Workflow:

As part of our inspection scope, All South's onsite inspector will provide daily report updates and communication with All South's lead engineer. Reports will be shared electronically through Site Manager, and pictures will be stored on All South's cloud-based database and file-sharing system to build a complete record of the project. Reports will be updated at the end of each day, ensuring communication is the foremost priority.

Construction Contract Administration and Engineering Proposed Daily Workflow:

As part of our construction engineering scope, All South's lead engineer will develop meeting agendas, attend all progress meetings, review all daily reports, review and respond to RFI's, approve all pay applications, and attend all critical path construction activities. Our lead engineer will coordinate all construction activities with the construction coordinator.

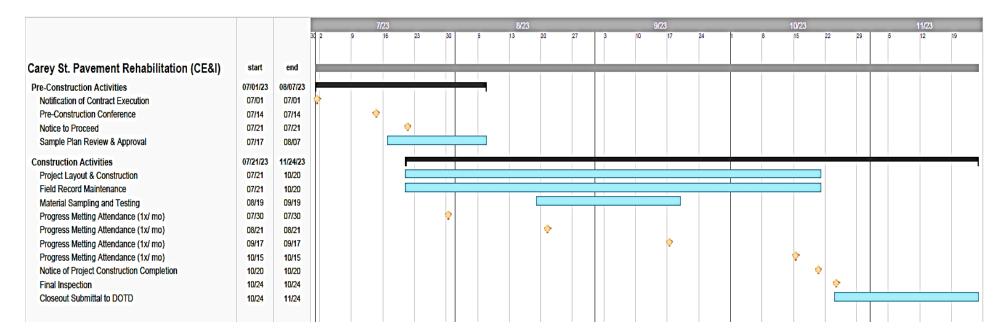

CE&I Task 4: Construction Completion

Upon notification from the Contractor that the project is complete, All South's project team will conduct a Final Inspection in conjunction with DOTD. Final Acceptance can be granted upon successful completion of the Final Inspection and concurrence from all stakeholders.

CE&I Task 5: Post-Construction Activities

Post-Construction activities include gathering all documentation into acceptable submittal formats. All South will follow DOTD's Construction Closeout checklist, and will compile all required field books, As-Built plans, project diaries, correspondence, and final acceptance documents.

A draft project schedule is included below. A sample construction execution date was used for scheduling purposes. Schedule may be adjusted based on contractor's ability to perform work.

19. Workload:

For all contracts where a firm on the team is a prime consultant or sub-consultant and where **a**) the consultant selection was made by DOTD, and **b**) a contract was executed by the consultant and the contracting entity by the date the advertisement for this proposal was posted, list all work meeting the following criteria:

- 1) one of the team's firms is responsible for the performance of the work;
- 2) authorization to perform the work has been provided, as provided in the contract between the consultant and the contracting entity;
- 3) the work has not yet been performed and invoiced; and
- 4) the work is not currently suspended for an indefinite period of time.

For indefinite delivery/indefinite quantity (IDIQ) contracts, list open Task Orders individually.

List only the portion of the fees attributable to firms on the team.

Firm(s) ALL FIRMS MUST BE REPRESENTED IN THIS TABLE	Past Performance Evaluation Discipline(s) *	Contract Number and State Project Number	Project Name	Remaining Unpaid Balance**
