APPENDIX A – PLAN TYPES AND CATEGORIES

APPENDIX B – DIRECTIVE PLANS

1.0 INTRODUCTION

This Part 6 – Scope of Services Package Plans contains the Scope of Services Package Plans created during preliminary design and the standard drawings of the Louisiana Department of Transportation and Development (LA DOTD) and other stakeholders that shall be used for the Project. Applicable CADD files in electronic format on CD-ROMs (Compact Disc – Read Only Memory) are included in the Reference Documents.

The Scope of Services Package Plan types contained herein are categorized as directive plans. Directive plans are those plans that depict required elements and components of the Project within specifically defined parameters. The Design-Builder has limited or no latitude to adjust components or details shown on directive plans. Examples of directive plans include the following:

- A) Basic Project Configuration plans that depict the Basic Project Configuration within the limits defined in the Contract. For purposes of this Project, the Basic Project Configuration plans are the ROW plans;
- B) Final LA DOTD plans (*see* Section 3.0) signed and sealed by a licensed engineer that represent the final design of a self-contained component of the Project, such as the pavement typical sections. The component is essentially a piece of design-bid-build work within the Project. The Design-Builder has no responsibility for the design of the component except for the design of its interface with other components of the Project. The component shown on final LA DOTD plans is to be constructed as shown; and
- C) Right-of-Way (ROW) plans that depict the limits of ROW or easements obtained or to be obtained by the LA DOTD.

2.0 PLAN TYPES AND CATEGORIES

The plan types and categories are shown in Appendix A to this Part 6 – Scope of Services Package Plans.

3.0 DIRECTIVE PLANS

The directive plans for this Project are contained in Appendix B to this Part 6 – Scope of Services Package Plans.
