  - \* Series Circuit Transformers
  - \* Types of Lamps and Light Sources
  - \* L-858 Signage
  - \* LED & In-pavement fixtures
  - \* Series Circuit Troubleshooting
  - \* Approach Systems ALSF / MALSR
  - \* Rotating Beacons
  - \* Maintenance Management

This formal standardized training course will cover fundamentals of airport lighting elements and troubleshooting deemed most urgent for airport support personnel and management. Completion of the seminar should increase the attendee knowledge and safety awareness of various operational airfield lighting systems installed supporting your airport.

Each day there will be adequate discussion time so that your airport's needs, as well as specific problems and solutions, may be covered. A comprehensive manual will be furnished to each class attendee covering in detail the program subjects along with a CD ROM containing reference materials such as current FAA Advisory Circulars and International Regulations as deemed appropriate. Further, each class attendee will be presented a certificate signifying successful completion of the course. Please remember the final day will not end until approximately 11:30 a.m. Dress is causal

For three and one-half days your instructors will be Mr. David Rainey, Vice President of Airfield Systems Development for Navaid Lighting Associates, Inc. of Saltillo, MS and Mr. Seward Ford of Visual Aids Services of Windsor, CT. Also, we will be there, to answer questions and to further assist the instructors during the classroom sessions..

**Seminar Tuition Paid By DOTD**  
**Attendee Responsible for Transportation - Food - Lodging**  
**Registration required for seminar seat confirmation**  
**Must respond NLT than Thursday, February 11<sup>th</sup>**
