for

## **FY 2020-2021 Airport Construction & Development Priority Program**

The actual project cost, on a project by project basis, may be below or above the estimate. The total amount approved for the Airport Construction and Development Priority Program (hereinafter referred to as the Program), for fiscal year 2020-2021 approved by the Louisiana Legislature, will not be exceeded.

*In accordance with Act 451, 1989 regular Session, Louisiana Revised Statutes 2 §803 (B) states, "...if governing authority of an airport authority, district, parish or of any local unit of government obtains ninety percent or more funding for an airport, or for an airport project, from federal sources or from sources other than state funds, the legislature shall give priority to funding the remaining amount necessary for the airport or for the airport project, even if the project is not on the priority list of projects."*

With the passage of the Federal Omnibus bill and the FAA Appropriation Bill, additional federal discretionary funding may be available for governing authorities of airports that are in the National Plan of Integrated Airport Systems (NPIAS). State funding may be required to ensure the match to additional federal funding through this program. The availability of funds will be determined by the Department and distributed in accordance with the following as approved by the Louisiana Legislature:

- 1) Any other project or eligible enhancements to previously approved or new projects which receives 90% funding from any federal source through special appropriations packages.
- 2) Any other project or eligible enhancements to previously approved projects which receives 90% funding from any source, other than another State source, but which has not been processed and prioritized and is not in either the FY 2020-2021 funded or the FY 2021-2025 planned and long-range portion of the Program.
- 3) The General Aviation and Reliever Airports Maintenance Grant Program shall be funded in accordance with the conditions specified in L.R.S. 2 Chapter 8.
- 4) In the event that additional funds become available through underruns, project cancellations, or unplanned appropriations, state only projects required for safety or infrastructure preservation at airports may be moved from the FY 2020-2025 Planned and long-range unfunded portion of the Program to the funded list.
- 5) Aviation Appropriations in the Transportation Trust Fund (TTF) will not be used as a match for projects funded with Passenger Facility Charges (PFC) as PFCs can be applied for and approved by the FAA at 100% of the project cost.

## PROJECTS RECOMMENDED FOR CANCELLATION
