PROJECTS TO BE CANCELLED

Listed below are projects in the Aviation Priority Program for the Fiscal Years indicated. These projects are either idle or outdated and their scopes of work are no longer valid. Therefore, we recommend approval of the sponsor's request to withdraw the following projects from the Aviation Priority Program:

Fiscal Year 2009-2010 Funded List

3AC – Baton Rouge Metropolitan Airport – ARFF Vehicle
11AC – Lake Charles Regional Airport – Extend Runway 15/33 (Design)
17AC – Baton Rouge Metropolitan Airport – ARFF Building Renovations and Expansion

2GA – Slidell Airport – Overlay Runway 18/36
16GA – Houma-Terrebonne Airport – Re-Cable Runway 12/30 and Associated Taxiway Lighting
20GA – Leesville Airport – Runway Safety Area Improvements – Phase I (South of Apron, West of Runway)

Fiscal Year 2010-2014 Unfunded List

85GA – Abbeville Chris Crusta Memorial Airport – Rehabilitate Runway, Taxiways and Aprons

Fiscal Year 2006-2007 Funded List

5GA – Shreveport Downtown Airport – Overlay Taxiway “F” (Engineering Only)

Additional Comments to the Aviation Program Funded 2010-2011 and Unfunded 2011-2015

With the pending changes to the Federal Aviation Administration (FAA) funding authorization, which could change the FAA required match from 95-5 to 90-10, all of the funding information provided in these reports is based on cost estimates and anticipated respective required matches. The actual project cost, on a project by project basis, may be below or above the estimate. However, the total amount approved for the Aviation Priority Program, for fiscal year 2010-2011, will not be exceeded.

In accordance with Act 451, 1989 regular Session, paragraph 803 (B), which states "...if governing authority of an airport authority, district, parish or of any local unit of government obtains ninety percent or more funding for an airport, or for an airport project, from federal sources or from sources other than state funds, the legislature shall give priority to funding the remaining amount necessary for the airport or for the airport project, even if the project is not on the priority list of projects." The legislature does further authorize LA DOTD to provide matching funds for any project during the Fiscal Year 2010-2011, which does not specifically appear on the list of projects developed in compliance with the Louisiana Airport Needs and Priority Development Program, but which has received a commitment of ninety percent or more funding.

The available funds will be distributed in the following order:

- 1) Projects in the FY 2010-2011 Aviation Program are funded directly from the Transportation Trust Fund that is allocated in FY 2010-2011 to the Aviation Program.
- 2) Any other project or eligible enhancements to previously approved projects which receives 90% funding from any source, other than another State source, but which has not been processed and prioritized and is not in either the FY 2010-2011 funded or the FY 2011-2015 unfunded portion of the Aviation Program.
- 3) The General Aviation and Reliever Airports Maintenance Grant Program shall be funded in accordance with the conditions specified in Chapter 8 of Title 2 of the Louisiana Revised Statutes.
- 4) In the event that additional funds become available, through special appropriations, underruns, project cancellations, or otherwise, certain unfunded, state only projects required for safety or infrastructure preservation at airports not eligible for Federal Aviation Administration (FAA) Airport Improvement Program (AIP) funding may be moved from the unfunded FY 2011-2015 Aviation Program (unfunded list) to the FY 2010-2011 Aviation Program (funded list).
- 5) Any project which receives no federal or other non-state funding and is eligible for State only funding may be programmed for an amount not to exceed three million dollars for a commercial service airport and seven hundred fifty thousand for a general aviation airport in state funding through the Aviation Priority Program per fiscal year.
- 6) Aviation Trust Funds will not be used as a match for new projects funded with Passenger Facility Charges (PFC) as PFCs can be approved by the FAA at 100% of the project cost.

GLOSSARY

AC (Air Carrier): Airports or aircraft providing service to fare paying passengers

Apron: Parking area for aircraft

ARFF (Aircraft Rescue & Firefighting): Trucks and equipment for fighting aircraft fires

ATC (Air Traffic Control): A service operated by appropriate authority to promote the safe, orderly, and expeditious flow of air traffic.

AWOS (Automated Weather Observation System): Automated system that transmits weather data to aircraft

Blast Pad: Concrete extension at the end of a runway to prevent erosion caused by jet blast

Construct: Build a new system

DME (Distance Measuring Equipment): A transponder-based radio navigation technology that measures distance by timing the propagation delay of radio signals

DNL (Average Day/Night Noise Level): Noise levels measured in the vicinity of an airport

EDS (Explosive Detection System): Electronic equipment for screening luggage

EMAS (Engineered Mechanical Arresting System): An area at the end of a runway paved with special, soft concrete to stop aircraft in an emergency

FBO (Fixed Base Operator): A commercial operator of aviation services on an airport that provides fuel, maintenance, aircraft rental, etc.

GA (General Aviation): All aviation except air carriers and military

GLS (GNSS Landing System)

GNSS (Global Navigation Satellite System)

Grooving: Longitudinal grooves cut into runways to promote drainage and prevent hydroplaning

Holding Bay: Paved pull-off area for temporary aircraft parking near the runway end

Incursion Device: Detects aircraft or vehicles that go onto a runway without approval

Joints: Space between concrete slabs

LNAV: Lateral navigation instrument approach procedure

LNAV/VNAV: Lateral Navigation/Vertical Navigation instrument approach procedure

Localizer: The component of an instrument landing system that provides course guidance to the runway centerline.

LOI: (Letter of Intent) The FAA's intent to obligate AIP discretionary and entitlement funds from future budgetary authority in an amount not greater than the Federal Government's share of allowable costs for that project.

LPV: Localizer performance with vertical guidance instrument approach procedure

MALSR (Medium Intensity Approach Lighting System with Runway Alignment Indicator Lights): Lighting system used to align landing aircraft with the runway

Marking: Numbers, letters, and symbols painted on runways and taxiways

Master Plan: A plan for airport growth during a 20-25 year period

MIRL (Medium Intensity Runway Lights): Lights that mark the edge of a runway

MITL (Medium Intensity Taxiway Lights): Lights that mark the edge of a taxiway

Noise Compatibility: FAA program to assist homeowners near airports

Obstruction Removal: A planned program to remove obstructions (trees, buildings, ditches, etc) from an RPZ or safety areas

Overlay: A layer of asphalt placed on top of an existing asphalt surface

Overrun: Area beyond the end of a runway used for aircraft unable to stop on the runway

PAPI (Precision Approach Path Indicator): A visual landing aid that provides landing information by the use of colored lights

Parallel Taxiway: A taxiway paralleling a runway

Passenger Loading Bridge: Enclosed movable hallway connecting a passenger aircraft to the terminal

RAIL (Runway Alignment Indicator Lights): Sequence flashing lights used as part of an approach lighting system

Ramp: Parking area for aircraft

Reconstruct: Rebuild an existing system

Rehabilitate: Major repairs to an existing system

REIL (Runway End Identifier Lights): Flashing lights that identify the runway end

Rejuvenator: An additive that replaces lost oils in asphalt

RPZ (Runway Protection Zone): Area which must be free of vertical obstacles

Runway: A strip of concrete, asphalt, or turf used for the landing and takeoff of aircraft

Safety Area: Land immediately adjacent to runways and taxiways

Sealcoat: Protective surface applied to asphalt pavements (sometimes called a slurry seal)

Seaway: Landing area for seaplanes (airplanes on floats)

Segmented Circle: A system of visual indicators designed to provide traffic pattern information to aircraft

Sound Mitigation: FAA program to assist homeowners near airports

SSALR (Simplified Short Approach Light System with RAIL): Lighting system used to align landing aircraft with the runway

Striping: White or yellow lines painted on runways and taxiways

Stub Taxiway: Small taxiway connecting a runway to a parallel taxiway, apron or ramp

Taxilane: Small taxiway leading to hangars

Taxiway: Strip of concrete, asphalt, or turf used to move aircraft to and from the runway

Terminal: Building used by pilots and passengers for creature comfort and flight planning. Also adjacent aircraft parking

T-hangar: Hangars shaped like a “T” designed for storing airplanes tail to tail

Tie Down: A ring set in an apron for anchoring small aircraft

UHF (Ultra High Frequency): Radio signals primarily used by military aircraft

Vault: Building that houses electrical equipment for an airport

Wind Cone: Device for detecting and displaying wind direction (also called wind sock)

Wind Tee: Device for detecting and displaying wind direction
