

Initial Underwater Inspection Request Form

Date: _____

Recall Number: _____

1. Is the substructure consistently in 4ft or more of water?
If the substructure is not consistently in 4ft or more of water but you feel a more in-depth inspection is warranted, in the box below you can justify that a one-time "Special UWI" be performed to verify substructure condition.
2. Deepest water depth at pile from the most recent inspection =
3. Have the bridge inspectors attempted wading and/or probing but are unable to inspect full depth of submerged substructure?
[Attempts at wading and/or probing are to be thoroughly noted in the inspection report.]
4. Are there access limitations that would require advanced equipment?
[For example, low clearances, or confined spaces (i.e. culverts)]

If questions 1 and 4 above are answered "No", but the District still feels like the bridge needs to be added to the Underwater Inspection list, please explain:
